SKILLS

Languages: Kotlin, Java, Python

Mobile Development: Android SDK, Jetpack (ViewModel, LiveData, Navigation), Jetpack Compose, MVVM Architecture

Backend & Cloud: Spring Boot, REST APIs, AWS Services (Lambda, S3, DynamoDB), WebSockets

Databases: MySQL, SQLite, Firebase (Realtime Database, Firestore)

Machine Learning: ML Kit, Tensorflow Lite, On-device Model Integration

WORK EXPERIENCE

Beetonz InfoTech • Ahmedabad, India

May 2022 – May 2023

Android Developer

- Worked as the sole Android developer across multiple production applications, taking ownership of development from initial architecture through Play Store release..
- Applied MVVM with a Repository pattern consistently across projects, keeping data and UI layers separated for cleaner, more maintainable code.
- Integrated third-party REST APIs for features such as data fetching and real-time updates, handling authentication, error states, and response parsing within Android client.

Beetonz InfoTech • Ahmedabad, India

Feb 2022 – Apr 2022

Android Developer Intern

- Developed UI components and feature screens for medium-scale applications under senior developer mentorship, following team coding standards.
- Implemented local data persistence using SQLite and Firebase, gaining practical experience with offline storage strategies and backend integration patterns.

PROJECTS

Plated – Recipe Sharing Social App

Personal Project - Java, Kotlin, Jetpack (ViewModel, LiveData), Spring Boot, MySQL, Retrofit, REST APIs

- Built an Android social feed app with Jetpack, supporting recipe posting, likes, comments, and follow-backed by a Spring Boot REST API with JWT authentication.
- Designed the backend schema to handle relational social graph queries and built all layers independently; Android client, API, and database.

Video Background Removal App

Professional Project - Java, XML, CameraX, FFmpeg, MLKit

- Built an Android app for real-time video background removal and green-screen replacement using ML Kit segmentation and FFmpeg, with all processing handled on-device..

FairShare – Group Expense Tracker

Graduate Capstone - Kotlin, Java, Spring Boot, MySQL, AWS (EC2, S3, SNS)

- Built a full-stack expense-splitting app: Android client in Kotlin(Jetpack, MVVM) backed by a Spring Boot REST API deployed on AWS EC2.
- Designed a MySQL schema supporting multi-group expense allocation and real-time balance updates.
- Handled cloud infrastructure setup including EC2, S3 for receipt storage, and push notifications via AWS SNS.

EDUCATION

California State University, East Bay • California, USA

May 2025

M.S. in Computer Science - GPA: 3.5 / 4.0

- Relevant Coursework: Database Systems, Machine Learning, Advanced AI, Cloud Computing

SAL Institute of Technology & Engineering Research • Ahmedabad, India

May 2022

B.E. in Computer Engineering
